

INDUSTRIAL PROCESSES | TITANIUM DIOXIDE

SOLUTIONS
FOR DIFFERENT
APPLICATIONS

CATEGORY	PRODUCTS	DESCRIPTION
COATINGS & INKS GRADES	AOTiOx C-01	Rutile Titanium Dioxide Pigment that presents a balanced performance, easy to disperse and made by chloride process. It is indicated for water or solvent based systems.
	AOTiOx C-10	Rutile Titanium Dioxide Pigment that presents excellent performance, produced through chloride process. Its is preferably used on coatings requiring gloss and weather fastness.
	AOTiOx R-04	Rutile Titanium Dioxide Pigment that presents a balanced performance, easy dispersion. It is indicated for water or solvent-based systems.
	AOTiOx R-06	Rutile Titanium Dioxide Pigment that presents High Performance and universal application. It is indicated for coatings that require brightness and weather fastness.
PLASTICS GRADES	AOTiOx C-02	Rutile Titanium Dioxide Pigment, obtained through the chloride process, specially designed for highest quality masterbatch, PE, PP, etc resins.
	AOTiOx R-03	Sulfate Rutile Titanium Dioxide Pigment without surface treatment for economic masterbatch, etc.
	AOTiOX R-05	High Performance Rutile Titanium Dioxide Pigment, specially designed for masterbatch, PE, PP, etc resins.
	AOTiOx R-06	High Performance, universal application, Sulfate Rutile Titanium Dioxide Pigment, suitable for PVC resin applications, such as pipes, etc.

PH KENNEX PLAZA Building
9th floor
Av. Samuel Lewis, 59 - Obarrio
Zip Code: 0807 | Panama
(+ 507) 310 0661 - Ext. 3043
