COATINGS & INKS GRADES

AOStiox C-01

Rutile Titanium Dioxide Pigment that presents a balanced performance, easy to disperse and made by chloride process. It is indicated for water or solvent based systems.

AOStiox C-10

Rutile Titanium Dioxide Pigment that presents excellent performance, produced through chloride process. Its is preferably used on coatings requiring gloss and weather fastness.

AOStiox R-04

Rutile Titanium Dioxide Pigment that presents a balanced performance, easy dispersion. It is indicated for water or solvent-based systems.

AOStiox R-06

Rutile Titanium Dioxide Pigment that presents High Performance and universal application. It is indicated for coatings that require brightness and weather fastness.

Products

PLASTICS GRADES

AOSTiox C-02

Rutile Titanium Dioxide Pigment, obtained through the chloride process, specially designed for highest quality masterbatch, PE, PP, etc resins.

AOSTiox R-03

Sulfate Rutile Titanium Dioxide Pigment without surface treatment for economic masterbatch, etc.

AOSTiox R-05

High Performance Rutile Titanium Dioxide Pigment, specially designed for masterbatch, PE, PP, etc resins.

AOSTiox R-06

High Performance, universal application, Sulfate Rutile Titanium Dioxide Pigment, suitable for PVC resin applications, such as pipes, etc.
